

## **Do's and Don'ts for Wireless networks**

- 1) Before using your wireless router turn on security.
  - 2) Use WPA security and not WEP.
  - 3) Turn on Access Control.
  - 4) Change the Web Administrators password.
  - 5) Change the SSID.
  - 6) Turn off SSID broadcasts.
  - 7) Place the router in a physically secure place.
  - 8) Turn off File and Printer sharing.
  - 9) Change the client side IP address.
  - 10) Upgrade to the latest software and hardware.
-
